

MUSTAFA ONUR KILINÇ

Computer Engineer

I am a conscientious and curious Computer Engineering graduate with practical experience in software development, AI computer vision model deployment and robotics. I have experience in collaborative app development from various projects I worked on. My passions lie in ADAS and autonomous systems, and I am motivated by responsibility and a desire to build systems with real world applications.

General Info

Turkish Air Forces
April - May 2025 (Paid)

Driver's License - Class B

Language Proficiency

- Turkish (Mother language)
- English (C1 level)

Hobbies

- Cycling
- Cooking
- Reading
- Watching Movies
- Listening to Music

Education

September 2018 - June 2024 — **Yıldız Technical University** GCPA: 2.85/4.00
BSc in Computer Engineering

Experiences

June 2023 - August 2024 — Lane Detection Department Member, **YTÜ Alternatif Enerjili Sistemler Kulübü**

- Integrated TwinLiteNet AI model for drivable area and lane detection via camera
- Integrated a CNN model for behavioral cloning with TensorFlow, tested in simulation
- Trained and mentored successors in the Lane Detection department

October 2023 - December 2023 — Process and Customer Development Department Intern, **Mars Logistics**

- Developed a Windows application in Pascal and connected the app to a local database to demonstrate desired improvements to the company's app

October 2022 - June 2023 — Team Member, **YTÜ Alternatif Enerjili Sistemler Kulübü**

- Wrote basic ROS nodes in C++
- Learned fundamentals of ROS

August 2022 - September 2022 — Information Technologies Department Intern, **Mars Logistics**

- Developed a C application to sort cargo according to its volume, weight and destination
- Assisted with company software's user operations

Experiences (Cont'd)

June 2019 - July 2021

Design Committee Member, **IEEE YTÜ Student Branch**

- Worked with other committees to develop advertising materials for their events
- Organized online lessons for how to use Canva and GIMP
- Trained and mentored successors of Design Committee department
- Participated in organizing events for the student branch

Projects

March 2024 - November 2024

TUBITAK 2209-A Project, **YTÜ Alternatif Enerjili Sistemler Kulübü**

- Trained a CNN model to drive a vehicle using human driving data (Behavioral Cloning)
- Utilized a simulation environment to collect training data and test CNN models
- Deployed Docker containers to fully utilize GPU while training

October 2023 - June 2024

Computer Engineering Final Project, **Yıldız Technical University**

- Collaborated with fellow Computer Engineering student to train AI image detection models
- Trained YOLOv8 model to detect cells in images from microscope
- Developed desktop app in Python and Tkinter for object labeling using trained AI models

October 2022 - June 2023

Computer Engineering Computer Project, **Yıldız Technical University**

- Collaborated with fellow Computer Engineering student to develop Android application
- Added notification listening, filtering and displaying functionality to said application

Certificates

Course Certificates

- The Complete Microsoft Excel Course 2025
- Toptalent English Level Certificate
- AI Destekli Veri Bilimi Eğitimi
- Uygulamalı Yapay Zeka Eğitimi

Certificates of Success

- 3. Otomotiv Yaz Kampı Certificate of Success
- TEKNOFEST Robotaxi Full-Scale Autonomous Vehicle Competition 2024 Certificate of Success

Skills

Programming Languages

- C/C++
- Python
- Java

Tools and Platforms

- Linux (bash)
- ROS Noetic
- SQL
- Git
- Docker (Beginner)

Soft Skills

- Teamwork
- Graphic Design
